

HW0: Class Policies

Gregory M. Shinault

Due Tuesday, January 29, 9:30am

Purpose of This Assignment

I think Gradescope will make grading more consistent and faster. The only clear downside is that you have to learn how to submit assignments. This assignment exists to ensure you know how to submit your first assignment on the course material.

If you were on the official course roster before day 1, I automatically added you to the Gradescope roster for this course. For those of you who have not used Gradescope before, this created an account for you. Follow the instructions below to access your account.

Instructions

- Go to gradescope.com. If you have not used Gradescope before, click the “Log In” button. Then click “Forgot your password?” to receive a password reset email to your @wisc.edu account.
- If you are unable to send a password reset email, please contact me.
- Once you are able to access your Gradescope account, please verify that you are enrolled in **Math 431 002/003**. Contact me if this is not the case.
- Complete the problems below. They can be handwritten or typed.
- Create a PDF of your problem set and submit it.

Problems

1. What is the date and time of the first midterm exam?
2. What is the date and time of the second midterm exam?
3. What is the date and time of the final exam?
4. What is the late work policy for this course?

5. Are there any extra credit opportunities in this course?
6. What is the last day to request a regrade for an assignment?
